

CITY OF BOYNTON BEACH

(PLAN SPONSOR)

FIREFIGHTERS' RETIREMENT SYSTEM

Investment Policy Statement

I. PURPOSE OF INVESTMENT POLICY STATEMENT

The Pension Board of Trustees (“Board”) maintains that an important determinant of future investment returns is the expression and periodic review of the Boynton Beach Firefighters’ Retirement System (“the Retirement System”) investment objectives. To that end, the Board has adopted this statement of Investment Policy and directs that it applies to all assets under their control.

In fulfilling their fiduciary responsibility, the Board recognizes that the retirement system is an essential vehicle for providing income benefits to retired participants or their beneficiaries. The Board also recognizes that the obligations of the Retirement System are long-term and that investment policy should be made with a view toward performance and return over a number of years. The general investment objective is to obtain a reasonable total rate of return - defined as interest and dividend income plus realized and unrealized capital gains or losses - commensurate with the Prudent Investor Rule and any other applicable ordinances and statutes.

Reasonable consistency of return and protection of assets against the inroads of inflation are paramount. However, interest rate fluctuations and volatility of securities markets make it necessary to judge results within the context of several years rather than over short periods of five years or less.

The Board will employ investment professionals to oversee and invest the assets of the Retirement System. Within the parameters allowed in this document and their agreements with the Board, the investment management professionals shall have investment discretion over their mandates, including security selection, sector weightings and investment style.

The Board, in performing their investment duties, shall comply with the fiduciary standards set forth in Employee Retirement Income Security Act of 1974 (ERISA) at 29 U.S.C. s. 1104(a) (1) (A) – (C). In case of conflict with other provisions of law authorizing investments, the investment and fiduciary standards set forth in this section shall prevail.

II. TARGET ALLOCATIONS

In order to provide for a diversified portfolio, the Board has engaged investment professional(s) to manage and administer the fund. The investment manager(s) are responsible for the assets and allocation of their mandate only and may be provided an addendum to this policy with their specific performance objectives and investment criteria.

The Board has established the following asset allocation targets for the total fund:

Asset Class	Target	Range	Benchmark Index

Total Non-Traditional Assets	8%	0% - 25%	
Total Liquid Reserves	0%	0% - 5%	90-day T-Bill

Note: Allocation to Pvt. Investments shall be based on invested capital.

1. Absent of a full allocation, all or a portion of the target allocation will remain in domestic fixed income with the corresponding allowable range adjustment around the revised domestic fixed income target.
2. Absent of a full allocation, all or a portion of the target allocation will remain in the respective public investment allocation (domestic equity or fixed income) with the corresponding allowable range adjustment around the revised domestic equity target.
3. The "strategy index" for alternative assets is defined as the most appropriate index, combination of indices, or absolute return target for the investment(s) in question. The strategy index will be determined at the time of engagement based on the specific investment's long-term objective, prospectus, and/or governing documents and reflected in performance evaluation reports.

The Board working with the Investment Professionals will monitor the aggregate asset allocation of the portfolio and will rebalance to the target asset allocation based on market conditions. If at the end of any calendar quarter, the allocation of an asset class falls outside of its allowable range, barring extenuating circumstances such as pending cash flows or allocation levels viewed as temporary, the asset allocation will be rebalanced into the allowable range. To the extent possible, contributions and withdrawals from the portfolio will be executed proportionally based on the most current market values available. The Board does not intend to exercise short-term changes to the target allocation.

III. INVESTMENT PERFORMANCE OBJECTIVES

The following performance measures will be used as objective criteria for evaluating the effectiveness of the Investment Managers.

A. Total Portfolio Performance

1. The performance of the total portfolio will be measured for rolling three- and five-year periods. The Target Index for the Retirement System is defined in the TARGET ASSET ALLOCATION table including within this policy.
2. On a relative basis, it is expected that the total portfolio performance will rank in the top 40th percentile of the appropriate peer universe over three and five-year time periods.
3. On an absolute basis, the objective is that the return of the total portfolio will equal or exceed the actuarial earnings assumption.

B. Equity Performance

The combined equity portion of the portfolio, defined as common stocks and convertible bonds, is expected to perform at a rate at least equal to the respective indices indicated in the target allocation table. Individual components of the equity portfolio will be compared to the specific benchmarks defined in each Investment Manager addendum. All portfolios are expected to rank in the top 50th percentile of the appropriate peer universe over three and five-year time periods.

C. Fixed Income Performance

The overall objective of the fixed income portion of the portfolio is to add stability and liquidity to the total portfolio. The fixed income portion of the portfolio is expected to perform at a rate at least equal to the respective indices indicated in the target allocation table. Individual components of the fixed income portfolio will be compared to the specific benchmarks defined in each Investment Manager addendum. All portfolios are expected to rank in the top 50th percentile of the appropriate peer universe over three and five-year time periods.

D. Non-Core Fixed Income Performance

Non-Core Fixed Income invests in various classes of fixed income securities oriented towards credit. The role of this pool is to provide growth of capital and income generation, utilizing strategies that fall within the range of traditional fixed income/credit strategies. Many of these strategies will not be liquid allowing the Plan to take advantage of illiquidity premiums available in these markets. Investments may include Global Fixed Income, unconstrained bond strategies, structured credit securities, high yield corporate bonds, direct lending strategies, opportunistic credit funds, and distressed debt strategies. Eligible investments may include both rated and non-rated securities. Rated securities may include

those rated below investment grade. The portfolio is expected to perform at a rate at least equal to a blended index comprised of **the Strategy Index as defined in the Asset Allocation Table.

E. Real Estate Performance

The overall objective of the real estate portfolio of the portfolio, if utilized, is to add diversification and another stable income stream to the total fund. The real estate portion of the total fund, defined as core, open ended private real estate, is expected to perform at a rate at least equal to the NFI-ODCE Fund Index (EW) and rank in the top 50th percentile of the appropriate peer universe over 5-year time periods.

F. Alternative and Other Non-Traditional Asset Performance

The overall objective of the alternative and/or "other asset" portion of the portfolio, if utilized, is to reduce the overall volatility of the portfolio and enhance returns. This portion of the fund will be benchmarked as outlined in the manager addendum.
